misuse cases

1. Applications System:

misuse cases	Management
Stolen account	Immediately freeze accounts, and send email to the user

2. Logistic System:

misuse cases	Management
Lost signal (GPS)	1. Prepare a paper map 2. Hire employees who are familiar with the road
Warehouse explosion	avoid: 1. No open-fire nearby the warehouse 2. Set up the alarm 3. Staff safety training 4. Set up the warehouse in a remote place 5. Fire drill when it happened: Report fire to the police... and so on.
Traffic accident (Because it is transporting oxygen, it is likely to explode in a car accident, I don't know whether to consider)	1. buy insurance 2. Safety Training 3. Safe driving

3. Medical System:

misuse cases	Management

4. Bank System:

misuse cases	Management
Network disconnected	1. The APP should set up a guide language to calm customers' emotions 2. APP informs employees to contact the bank

5. IT System:

misuse cases	Management
The server crashed	1. Set up multiple servers (expensive) 2. Contact IT staff to resolve immediately

6. Loacl Company

misuse cases	Management
After obtaining certain customers through ROC APP, no longer use ROC, and sell oxygen at low prices	

notice: In the UK, labor costs are very expensive, and there is very little 24-hour maintenance.
